HE 5812 HIMOD fieldbus coupler	<p># 5812 5099 The fieldbus coupler HE 5812 connects the modular process I/O HIMOD system with a Profibus-DP network. The connection to the Profibus-DP is established via a 9-pin D-SUB socket. Up to 62 I/O modules can be connected to each bus coupler. The modules are connected via an internal bus system. Up to 16 modules can be operated directly on the bus coupler, and the system can also be expanded with an additional HE 5850 power module. In the bus coupler, the areas of supply voltage, fieldbus and logic are electrically isolated from one another. The system configuration of bus coupler and I/O modules can be determined quickly using the button integrated in the front of the housing. The individual modules can be configured and parameterized both via the fieldbus and via the SmartPort interface. Mains supply: 24VDC Display: 5 status LEDs Communication: Profibus DPV1, high speed</p>
HE 5861 HIMOD DMS module	<p># 5861 0099 The HE 5861 strain gauge module records the measured value from load cells, strain gauges or melt pressure sensors. If service is required, the module can be exchanged quickly and easily during operation (hot swap). The process values are shown on an LCD display. Strain gauges (DMS) are evaluated with a resolution of 23 bits. An analog universal output (14-bit) with parallel current and voltage signal and two relays for limit value monitoring are available. The areas of supply voltage, fieldbus, logic and inputs are galvanically isolated from each other. In the event of an error, the modules work with previously defined error values in order to ensure safe process control (fail safe). The</p>

	transmitter can be configured and parameterized via the SmartPort interface. Display: 1x LCD + 1x 2-color Communication: 3x buttons, various inputs Outputs: (0)4... 20mA, burden ≤ 600Ω, accuracy ≤ 0.1%, short-circuit proof 2 x NO contacts, loadable with 500 VA, 250 V, 2 A, ohmic load Process connection: 4-/6-wire connection for DMS, with supply 10V max. 125mA
HE USB TTL adapter for # 5851 3007	Model: HIMOD Process connection: USB/RJ10 Connections: plug locking Protection: with galvanic isolation
5851 0000 SmartControl Expert	Version: HIMOD system Project planning environment for HIMOD incl. Smart Control license enables simple operation, configuration, parameterization and commissioning. Communication takes place either via the SmartPort interface of the coupler module or via the fieldbus interfaces. EU commodity no.: 90329000
