The following version can be used as a functional replacement be used: 4WS2EM6-2X/10B11XLET315K17EV-100 (R901508361) The following should be noted for the XL valves of nominal size 6: (1) Please note the differences in dimensions. See data sheet 29564-XL versus data sheet 29564-XN. On size 6 XL valves, the cap is longer (+11mm). (2) A control may only be made from intrinsically safe Circuit with the electrical maximum values (see data sheet information). The user can achieve this by Installs safety barrier between amplifier and valve. See examples (parallel connection or individual control) as a suggestion in data sheet 29564-XL.
