<a href="#">L60010 5171</a>	Transducer laboratory 300N m-3000N m I WILLE No. 96524300 / Manufacturer: Stahlwille®
<a href="#">657215 130</a>	Torque wrench basic unit Standard Tested according to DIN EN ISO 6789. Use As the torque can be changed very quickly, ideal for repairs and small series. Design Sturdy, compact, one-arm torque wrench, pre-settable according to scale and self-triggering. The accuracy remains the same for tens of thousands of tightenings, as high-quality material is used for all wearing parts and the bending rod is only briefly stressed during work. Housing and handle made of sturdy rectangular tube. Scales can be readjusted. Left-hand tightening by changing the insert tools. Without insert tool (basic model); suitable insert tools no. 657582 – 657950. Units of measurement: Nm, lbfft. Note The guaranteed measurement accuracy of the torque only applies from the calibrated torque range according to DIN EN ISO 6789.
<a href="#">657800 2-13</a>	Open-jaw insert tool Design Drop forged; all tools with plug connection = rectangular shaft with spring-loaded retaining pin. This ensures that the insert tools are firmly and securely seated in the torque wrench. Note Please note the pitch of the insert tools and compare them with those of the adjustment tool (see test report/operating instructions for the torque wrench used). If there is a deviation, make a correction!
<a href="#">657900 1-8</a>	Design Drop forged; all tools with plug connection = rectangular shaft with spring-loaded retaining pin. This ensures that the insert tools are firmly and securely seated in the torque wrench. Note Please note the pitch of the insert tools and compare them with those of the adjustment tool (see test report/operating instructions for the torque wrench used).
