TAPCON® 230 Pro	<p>B23TKN00 Product description Automatic voltage regulator for regulation, control and monitoring of voltage power transformers in the compact housing design (W x H x D 218 mm x 324 mm x 150 mm incl. mating plug). Basic equipment - Central processor unit - Power supply: 85 265 V AC/DC - Auxiliary voltage supply 110 V DC for digital inputs - voltage measurement 100 V AC; current measurement 1 A or 5A; output load <1 VA, - COM: Service interface RJ45 Parallel operation Parallel operation for up to 16 transformers via CAN (galvanic isolation), tap synchronization (master/follower), circulating reactive current minimization Tap position indication Adjustable tap position capture using analog or digital signals BCD, DUAL, GRAY, 0(4) 20 mA or resistor contact series Operating instruction Installation instructions and connection diagrams. Complete operating instructions can be downloaded for free in the download center on our website Digital inputs 16 digital inputs, 2 galvanically isolated groups, DC 110 V, 55 V (logic "0") 82.5 V (logic "1") Digital outputs 16 digital relay outputs in 2 modules DC 24 to 220 V, AC 230 V, Resilience 3A, 8 active outputs (per module); 5A, 4 active outputs (per module) Analog inputs 4 analog inputs (adjustable) Installation set</p>

Installation set incl. patch cable and plug Protection type front IP54, rear IP20
